- Mosaic colours shown here are purely indicative, tonal variation is an inherent characteristics of any fired product.
- Size variation & irregular edges are inherent characteristics of recycled mosaics. These characteristics can affect the grout joint appearance and enhance the natural aura of the product.
- "Neon" look mosaics after exposure to natural/artificial lights for sometime gives photoluminescent effect which is visible in complete darkness. After few minutes the glow of this mosaic begins to decay, the effect gets reduced by 90% within an hour, which remains visible for next 6-7 hours.

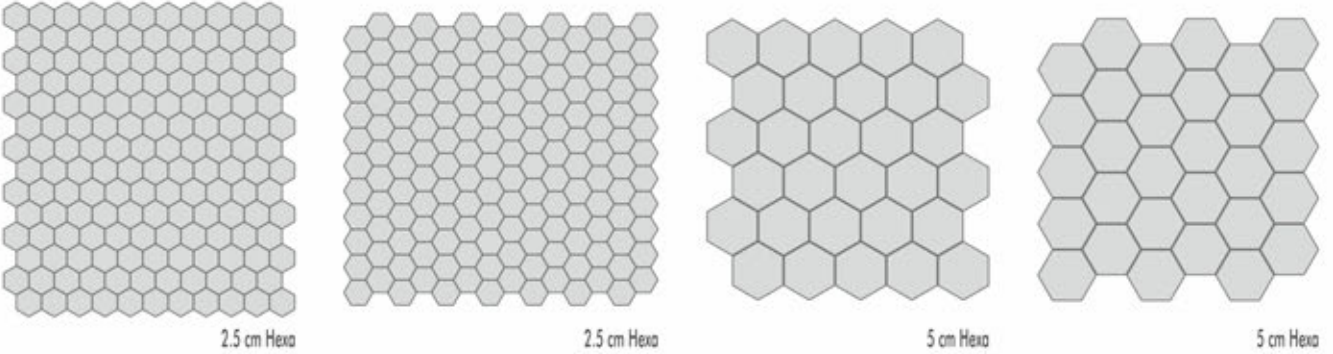

Aligned Technique - An arrangement of "unsize" mosaics in a regular grid layout, wherein the mosaic placement is parallel & perpendicular to each other with the specified joint gap.
